

This listing of claims will replace all prior versions and listings of the claims in this application.

Claims 1-8 (cancelled)

Claim 9 (previously presented) An electronic programming guide system comprising:

a personal computer comprising a browser at a first viewer location;

a computer system at a second location, coupled to said personal computer and said browser via a computer network;

said browser displaying a guide comprising a plurality of linearly arranged tabs, where each tab is a link to one of a plurality of views of an electronic programming guide;

where each of said plurality of views is associated with one of a plurality of sources of signals;

wherein at least three of said plurality of sources of signals are broadcast TV, programming delivered over the internet, and satellite TV;

wherein said guide includes a two-dimensional array of programming cells where each cell represents a different time slot associated with a different television channel;

wherein said plurality of linearly arranged tabs is disposed on a periphery of said two-dimensional array; and

wherein each of said plurality of views is limited to sources of signals available at said first viewer location.

Claims 10-15 (cancelled)

Claim 16 (previously presented) A method of displaying programming information to a viewer comprising the steps of:

providing, to a personal computer user, an array of programming choices available to a viewer;

changing a characteristic of said array in response to a selection, made by said personal computer user, of a tab from a plurality of linearly arranged tabs disposed along a peripheral edge of said array;

changing display content associated with one of said plurality of linearly arranged tabs as a result of a prior action;

wherein said prior action is a computer-generated signal representative of a prior viewing selection by a viewer;

wherein said prior action further comprises a user selection among a plurality of user preferences;

wherein said prior action further comprises a duration characteristic of a prior viewing selection by said viewer;

providing location information representative of a geographic location of said viewer and changing display content associated with one of said plurality of linearly arranged tabs based upon said location information; and

wherein each of said plurality of linearly arranged tabs is dedicated to one of a plurality of sources of programming available at said geographic location.

Claims 17-20 (cancelled)

Claim 21 (previously presented) A method of claim 16 wherein said plurality of sources of programming comprises broadcast TV.

Claim 22 (previously presented) A method of claim 21 wherein said plurality of sources of programming further comprises satellite TV.

Claim 23 (previously presented) A method of claim 22 wherein said plurality of programming sources further comprises internet delivered programming.

Claim 24 (previously presented) A guide of claim 9 wherein said plurality of sources of signals represents all video programming sources available at said first viewer location.
